W.W. DIMOND'S

Novelties in household utensils are not altogether new in Honolulu; other dealers have had them but the assortment has usually been limited to a half dozen articles in the same line.

In providing for the wants of the people on the islands, we have gone a step farther and secured novelties of nearly two hundred different kinds; little things, some of them, and selling as low as ten cents, but they are useful and their adoption by housekeepers makes life easier.

One of the new ones we have is a Roach trap, and if there is a house in Honolulu where an article of this character is not needed, we would like to know where it is.

This roach catcher differs from any we have ever seen and the effect upon the roach is surprising. It looks a good deal like a small, old fashioned cuspidore, and it is as neat as a new pin in appearance. A little cup at the top holds the molasses; just below is a yawning chasm and, as the roaches crowd around the 'lasses cup they topple over into the chasm and there they remain until they are dumped into the fire. It's rough on the roach but it's a good thing for folks in the house.

Another good thing is the Sanitary sink basket; costs fifty cents and is a positive preventive to choked pipes. You've seen the basket advertised in high class magazines, perhaps, and understand them. To those who have not the only description to be given is to say it is a three cornered enameled wire basket which fits in the sink directly over the discharge pipe. When throwing refuse into the sink drop it into the basket; the liquid runs off and the solids remain to be emptied into the refuse bucket.
